

PRESS RELEASE - FOR IMMEDIATE RELEASE

BAY AREA CIRCUITS TO HOST MANUFACTURING DAY 2016 EVENT

Silicon Valley, CA, September 26, 2016 – Bay Area Circuits, Inc., a leading quick-turn printed circuit board (PCB) prototype manufacturer, will be hosting a Manufacturing Day Event on Friday, October 7th for the third consecutive year. The company will open its doors to give attendees a tour of its production operations and get an up close look at some of the latest machine upgrades and technological advancements in the field.

“Manufacturing Day has been a great opportunity for us to not only showcase our Silicon Valley operation, but also allows us to connect with engineering students and introduce high technology manufacturing to them as a potential career path,” said Brian Paper, Chief Operating Officer, at Bay Area Circuits. “Our ability to be successful in the long term depends on our ability to attract skilled labor, and this event is helping us accomplish that.”

This year, Bay Area Circuits will be hosting 30 engineering students from Ohlone College, located in Fremont, CA. Students will get a crash course on printed circuit board manufacturing, including a first-hand look at how Bay Area Circuits has managed to set the standard for quick-turn prototyping and serving the needs of high-tech electronics manufacturers, contract assemblers, and design engineers for over 40 years.

Bay Area Circuits’ Manufacturing Day event will be held on Friday, October 7th at 10am. The event will be closed to the public, however, those interested in arranging a private tour should contact support@bacircuits.com. More information on Manufacturing Day can be found at: <http://www.mfgday.com/events/2016/bay-area-circuits-3>

About Bay Area Circuits Inc.

Founded in 1975 by the late Lawrence Nobriga, Bay Area Circuits has been serving the PCB manufacturing needs of high-tech electronics manufacturers, contract assemblers and design engineers for over 40 years. By focusing on quick-turn prototyping and production while leveraging innovative, high quality designs, Bay Area Circuits has become the premiere PCB supplier for discerning customers around the world.
