

PRESS RELEASE - FOR IMMEDIATE RELEASE

BAY AREA CIRCUITS ANNUAL OPEN HOUSE A HUGE SUCCESS

FACILITY TOURS HIGHLIGHT NEW EQUIPMENT INVESTMENTS

Silicon Valley, CA, October 28, 2015 – Bay Area Circuits, Inc., a leading quick-turn manufacturer of printed circuit boards (PCBs), hosted its third annual Open House on Friday, October 9th from 11:00AM to 3:00 PM.

Over one hundred and fifty people including customers and vendors attended the event which was first and foremost a celebration recognizing the company's forty years in business. The event also marked the unveiling of three cutting edge pieces of equipment that Bay Area Circuits has purchased in the past year including an Excellon 136L Intelli-Drill System, a Seica Flying Probe Test System and the Camtek Gryphon 3D Functional Inkjet Technology System for solder mask application; the first machine of its kind for which Bay Area Circuits is now operating in a production environment.

These three pieces of equipment were featured and demonstrated during a series of tours offered at the facility throughout the event. Attendees were also treated to a fantastic lunch provided by the locally renowned Slider Truck which was on site throughout the event!

"This is a great opportunity for us to give back to both our customers who make everything happen and to recognize our vendors who are always ready to help and support us in all of our endeavors throughout the year," said Stephen Garcia, President of Bay Area Circuits. "It was wonderful seeing everyone here having a good time while learning more about our company and what we do here. It has been a particularly good year for Bay Area Circuits but we always remember that we don't do it alone, and in fact it is the people we are hosting here who make it all possible."

About Bay Area Circuits Inc.

Founded in 1975 by the late Lawrence Nobriga, Bay Area Circuits has been serving the PCB manufacturing needs of high-tech electronics manufacturers, contract assemblers and design engineers for 40 years. By focusing on quick-turn prototyping and production while leveraging innovative, high quality designs, Bay Area Circuits has become the premiere PCB supplier for discerning customers around the world.
