

## **Conflict Minerals Policy Statement**

Bay Area Circuits is dedicated to upholding the highest standards of social and environmental responsibility across all aspects of our manufacturing and business operations. Recognizing the significant use of tin and gold in printed circuit board (PCB) manufacturing, we work exclusively with vendors who supply these minerals from conflict-free smelters. All sourcing practices comply fully with the standards set forth by the Responsible Business Alliance and the Dodd-Frank Act.

BAC maintains a Conflict Mineral Reporting Template (CMRT) for our printed circuit board (PCB) and related services. For additional information regarding tin and gold used in our PCB manufacturing, you can request our CMRT.
